

HERSELMAN CONSULTING SERVICES

Elize Herselman is a Soil Scientist by training with a PhD in Soil Chemistry, focusing on baseline concentrations of trace metals in South African soils. After graduating, Elize spent 15 years in soil research with focus on leaching of trace metals in the soil, plant metal uptake and soil attenuation capacity. The next 15 years was spent in environmental consulting for various clients in the mining, manufacturing and oil and gas fields. During this time Elize gained experience in the fields of waste and sewage sludge classification and management, contaminated land assessments, environmental site assessments and human health risk assessments.

Herselman Consulting Services is committed to independent and unbiased assessments with timely delivery of quality reports and integrated solutions.

Service offerings include:

- ❖ Waste management and classification
 - ❖ Waste Classification and Assessment (GN R. 634 – 636 of 2013)
